Nawras Wireless Data Link

Nawras Wireless Data Link (NWDL) is a point-to-point connection offering businesses the possibility to connect machines or offices via a dedicated data line. This service involves a secured mobile data line with a dedicated Access Point Name (APN) that connects two data ports. Typical users of this service are (but not limited to):

- Bank ATM machines located at a remote area and connected to the main office via NWDL
- Credit card POS machines connected via NWDL to the authorized bank branch

Product Features

- Secured and dedicated Access Point Name (APN)
- End to end encryption between modems and application server
- Communication enabled through Virtual Private Network (VPN) tunnel
- Cost effective service
- Dependable speed using Nawras 3G+ or EDGE service
- Choice of price plans to suit your needs

Customer Benefits

- Speed of service - No waiting for approvals or locations
- Mobility - No wires, you can change locations as & when you want
- Security - Dedicated APN known only to the business with end to end encryptions
- Economical - Our service costs less than those offered to you through other providers

Requirements

- Nawras Ajel (Post-paid) connection
- Nawras W25 modem or GlobeSurfer II
