Nokia Lumia 800

The Nokia Lumia 800 is the first Windows Phone handset to spring from the Microsoft / Nokia tie-up . The Nokia Lumia 800 shares its exterior styling with the previously substantially less hyped Nokia N9, a Meego-based smartphone, although the screen size is reduced from 3.9" (854x480 pixels) to 3.7" (800x480 pixels) to conform to the Windows Phone spec list.

The CPU, however, increases from the 1GHz ARM Cortex-A8 to the 1.4GHz MSM8255 Snapdragon/Scorpion which certainly helps add snap to the Windows Phone Mango OS. The Nokia Lumia 800, although being the more expensive of the two Nokia Windows Phone shares the Nokia N9's 16-bit AMOLED ClearBlack display whereas the Nokia Lumia 710 sports a 24-bit ClearBlack TFT. The colour depth is theoretically deeper than in the Nokia Lumia 710, AMOLED screens are seen as better than the older TFT technology due to the more vivid colours and better contrast ratios.

When it comes to internal storage the Nokia Lumia 800 has 16GB of fixed internal storage, with the Nokia Lumia 710 .The physical appearance of the Nokia Lumia 800 is a dream to observe and handle, with its smooth curves fitting snugly to the hand both with and without the protective case provided in the purchase packaging.

Nokia has worked very hard on the unibody design here, making the battery inaccessible and using top-mounted flaps to cover the charging port and SIM slot - intriguingly, we're seeing a microSIM here, which seems to be the fashion for the next wave of smartphones.

Three Dimension Thrill- LC A530

LG Electronics has unveiled the LG A530, a premium 3D notebook that offers the joy of seeing, shooting and sharing 3D content. A 3D dual webcam above the 15.6- inch Full HD 3D LCD screen lets users shoot their own 3D videos and photos. The metallic chassis envelopes innovative features that deliver an impressive stereoscopic 3D experience. The A530 allows simple hassle-free playback of 3D content from the notebook to LG's other cutting-edge 3D devices, such as smartphones, TV's and monitors. It includes a free pair of the lightweight 3D glasses and clip-ons. In addition, the LG A530 features an SRS Wide 3D Sound System for truly immersive audio.

The LG A530 sports a luxurious, modern exterior in a sturdy, ebony, black case. Its metallic look has a solid brushed aluminium finish, while the touchpad's edges have been rounded using real diamonds as the cutting element. A wider touchpad and pebble keyboard make the notebook's interior more ergonomic and comfortable to use. The LG A530 is now available in Oman at all the leading retail outlets.

Engineered Luxury

Superior BlackBerry performance and the elegant Porsche Design styling place the P'9981 Smartphone in a class of its own. With enhanced 1.2 GHz processor and 8 GB of onboard memory that powers a responsive browsing experience, the P'9981 supports 720p, HD video recording and dual band Wi-Fi. It comes with a built-in compass and access to a selection of exclusive apps. The Wikitude World Browser app helps you find, identify, access and forward relevant information instantly. The Smartphone is equipped with a Liquid Graphic 2.8 inch high-res full screen and a wide BlackBerry QWERTY keyboard for easier messaging and enhanced technology.
