

Know your Team

In this section we introduce various members of the Nawras Business Segment team. Today we are pleased to introduce the Head of products for Business fixnet services, Jonas Krenslar.

Having joined Nawras in May 2009, Jonas brings with him over 10 years of experience in the fixed line telecom business. He heads a dedicated department that looks at all fixed products and services aimed at the business segment and the recent launch of the business fixed services has brought to light the various products that he and his team worked on for the past 6 months.

The launch of fixed services marks only the start of activities for Jonas and his team who now needs to look at tailoring to the various requirements that you as the business customer will have.

A Swedish by birth but raised in Switzerland, Jonas also made news when he took over his new job in Oman by driving from Switzerland to Oman instead of taking a flight like most of us!

Jonas and his team looks forward to seeing you together with the key account managers to help you get more from your business.
